CORE COMPETENCIES

- Product Design
- UX Design & Strategy
- UI Design
- SaaS & Enterprise Design
- Product Discovery
- User Research
- Information Architecture
- User Journey Mapping
- Wireframing & Prototyping
- Interaction Design
- Design Systems & Tokens
- Component Libraries
- Responsive Design
- Accessibility (WCAG)
- Design QA & Developer Handoff
- Stakeholder Management
- Agile & Product Thinking
- AI-assisted Product Design

TOOLS

- Figma
- FigJam
- Framer
- Adobe Photoshop
- Adobe Illustrator
- Miro
- Jira
- Notion
- Maze
- Hotjar
- ChatGPT
- Claude
- Cursor

EDUCATION

Bachelor of Commerce
National College, Trichy
Jul 2019 - Jun 2022

CERTIFICATIONS

Google UX Design Professional Certificate
Coursera
Jun 2025 - Sep 2025

Graphics & UX/UI Design Certificate
Buff Creative College, Chennai
Jul 2022 - Jan 2023

LANGUAGES

Tamil	Native
English	Intermediate

PROFESSIONAL SUMMARY

Product Designer with 3.5+ years delivering end-to-end **SaaS** and **enterprise applications**. I lead **product design** from **discovery** through **implementation** — defining **UX strategy**, building **scalable design systems**, and crafting **interaction patterns** that turn complex domains into intuitive experiences. Skilled at partnering across product, engineering, and stakeholder teams to align business goals while integrating **AI-assisted workflows**, **accessibility compliance**, and **responsive design**.

EXPERIENCE

- **Vyssr Solutions Pvt Ltd, Chennai** — **Feb 2023 - Present**

Product Designer (UX/UI)

- Led **end-to-end UX/UI** for 12 **enterprise SaaS platforms** by conducting **discovery research** and mapping workflows, simplifying complex operations across logistics, insurance, and legal-tech.
- Designed **scalable dashboards** and **workflow systems** by restructuring multi-step processes into streamlined patterns, reducing operational friction and data-entry errors for enterprise users.
- Established a **unified design system** with **reusable components** and **tokens**, enabling three teams to ship cohesive UI and accelerating **design-to-development handoff**.
- Collaborated with **product managers** and **engineers** in **agile sprints**, translating strategic goals into prioritized features that aligned user needs with business objectives.
- Optimized user journeys by conducting **usability testing**, **heuristic evaluations**, and **journey mapping** — resolving critical drop-off points through actionable **wireframes** and **prototypes**.
- Delivered **accessible, responsive experiences** across desktop, tablet, and mobile by applying **WCAG guidelines** and device-specific **interaction patterns** for consistent usability.
- Improved **developer confidence** by producing **annotated specifications** and **interactive prototypes** with clear interaction states, reducing ambiguity and shortening QA cycles.
- Scaled **brand coherence** across marketing websites, landing pages, and product interfaces by creating a shared **visual language** that strengthened product trust across touchpoints.

KEY ACHIEVEMENTS

- Designed UX/UI for multiple **enterprise SaaS products** spanning logistics, insurance, legal-tech, AI, and business automation — owning the **full design lifecycle**.
- Established **scalable design systems** and **component libraries** that unified **product UI** across teams and improved **design-to-development handoff**.
- Simplified **complex workflows** through **research-driven interaction design**, reducing task friction and improving task completion in enterprise tools.
- Partnered with engineering throughout **implementation** — conducting **design QA** to ensure output matched **design intent** and **accessibility standards**.
- Delivered **responsive experiences** optimized for accessibility, performance, and **cross-device consistency** across desktop, tablet, and mobile.

FEATURED PRODUCT EXPERIENCE

Enterprise SaaS Applications (12) — Dashboards, workflow systems, and business platforms.
Business Websites (51) — Responsive marketing sites, landing pages, and corporate experiences.
Mobile Applications (6) — Mobile-first experiences with scalable design systems.
Smart Watch Interface (1) — Wearable UI focused on usability and simplified interactions.
Brand & Marketing Design (28) — Visual assets aligned with digital product ecosystems.
